Title: "Shift Happens-Be more Resilient to Thrive through Change. Teaching and learning during Covid"

Abstract: For educators, lecturers, teachers and learners the COVID-19 Pandemic is a quintessential adaptive and transformative difficult step, one for which there is not any guidance that can lead them to able to know what to do, how to take a step and for suitable answers responses. Education leaders, teachers, lecturers must quickly give answers and feedback to learners – and with pre-prepared contexts and responses in mind. As the pandemic is still and unfortunately going on, in other words, runs its course, we all have to know and take a further step to run our courses since education never stops, should never stop. This discusses the period of a series which we found ourselves into and presents the results of a comparative analysis of emerging educational needs and responses as the pandemic unfolds across countries around the world. The whole aim is to facilitate the quick design process and implementation and application of adaptive preparation courses to the emerging education challenges, and to preserve learners' educational opportunities during and following the pandemic.

Bio: Arzu Soysal has got three degrees in Public Management, ELT and Education Management, two MA's in ELT in Near East University and in Cambridge University, before pursuing and doing doctoral research PhD, at London Metropolitan University. She has worked as an English teacher in different schools and universities. She has also studied different minor branches in universities like American University in DC. She has got a lot of publications, and has also contributed to lots of publications and researches.
