## KEYNOTES

**Dr. Natalya Khokholova**

Kazakh National and Pedagogical University, Almaty,  
Kazakhstan

**Keynote Title:** “Implementation of sustainable development goals in the training of science teacher”

**Abstract:** Coined by the Russian formalist Mikhail Bakhtin, the term chronotope in 1937 helps the reader scholars to understand the context of the time and socio-economic conditions in which the given text was conceived. Chronotope is an interaction between time and space that provides the full tempo and progression of the provided story. Thus, consideration of this semiotic field generated by the amalgamation of time and space aids readers in understanding the development of the narrative and appreciating its emotion-fused rhythmic effects. The same approach of acknowledging time and space to recognize the issues in Education is advisable to eliminate or deal with them. There are three main issues in the World right now: Crisis in Education, CoVid-19, and Climate Change. Although there is a palpable and overwhelming crisis in Education, it is hard to define this tendency’s specific reasons and chronological line. Contemporary Issues in Education began earlier than the pandemic of CoVid-19 that caused distancing and isolation and made the classroom teaching/learning experience redundant. And perhaps, it is contemporary to Climate Change, an outcome of the inhumane and exploitative methods of men harvesting and using the planet’s natural resources to their dangerous short-term gain. However, the recent studies reveal that the issues in or with Education began with the occurrence of the new language: a language of coding, a digital linguistic unit, the one that can create and augment the alternative and virtual reality, and is making the classical languages subsidiary. This post-millennia phenomenon affected the learners’ ability to keep their focus long enough to tolerate the entire standard fifty- minutes lecture or to finish reading Leo Tolstoy’s masterpiece War and Peace (1869). Therefore, the solution is to come to terms with accepting the new norm, the illusory digital dominance, and by interconnecting it with the traditional methods of searching for the ultimate truth.

**Bio:** Dr. Natalya Khokholova holds a position of Associate Professor at Yeosu Technical Institute in Tashkent, at the Department of Humanities and also performs her duties as an examination assessment specialist for the Quality Assurance Board. She teaches a variety of courses from Teaching methods of ESL to the Introduction to Economics for the Art and Design department. She received her Ph.D. degree in 2015, from University of Illinois, Urbana-Champaign from the Department of Slavic Languages and Literature.

She is the author of articles on financial adventures of characters of the 19<sup>th</sup> century Russian novels, and the matters of gender in Soviet film, in Sergei Eisenstein's aesthetics.
